Linear liquid gel filling machine series, is using the world advanced technology, the use of PLC and electronic optical fiber sensor control, microcomputer text display touch artificial interface operation. The filling bottle. Stop with no bottle. And counting function. The production records - the day down. The equipment is mainly used for various paste sauce the filling. Suitable for food, sauce, cream body filling. (such as tomato sauce, jam, peanut butter, small shrimp sauce, bean paste, roe sauce), contact surfaces and materials are made of 304 stainless steel material manufacture, no leakage, no drawing, easy to clean. No dead angle, completely to meet the requirements of GMP standard of national pharmaceutical industry.

Equipment characteristics: no residue on the surface of the bottle after bottle filling, ensure the equipment surface and surface cleaning, simple operation, convenient repair. The use of stable, high automation and intensity. Suitable for liquid, jam, paste, cream and so on.

Technical data

Filling volume : customized

speed: customized

1 head interactive cap screwing machine is the new product developed by our company. It **magnetic moment** capping head to screw the caps. It is practical, and the ideal equipment in such industries like pharmacy, food, chemical industry etc.

This machine consist of: (1) machine shelf, (2)plate, (3) capping head, (4) conveyor belt, (5) **convey cap trail** (6) **Shake hopper**, (7) electric machine control box, (8) electric motor, (9) capping risen and down part (10) **cap scraping head**

Cap shake hopper

cap track

This machine is the new machine which in these years we design and make it. Man can set the number of steps peristaltic pumps with microcomputer to perform metering filling (special occasions with ceramic pump).

It has the functions: automatic filling, and capping. The machine is equipped with special internally unique mechanical hand. These can ensure the cover to enter the bottle, so that it achieves fully automatically. The machine fully meets with new GMP requirements.

Characteristic:

- 1: Set by microcomputer, high precision, easy operate.
- 2: filling system has sucked back, no dropping or leakage
- 3: use the mechanical hand to press the cover
- 4: no bottle, no cap no capping

Main technical parameters:

Productivity: 800-1000BPH

Power Supply 220V/50Hz(customized)

Capping Rate $\geq 99\%$

Air Supply 2 m³/h 0.4-0.8Mpa

Power 1.0 kw

1. The Scope of Application

Label on the front and back sides of different kinds objects, such as round bottle, flat bottle, square bottle, cans, jars, carton and so on.

2. Device Characteristic

Adopt mature technology PLC control system, operation is stable and high-speed

Using touch-screen man-machine interface operating system, simple and efficient;

Miza company for Import and Export.

Email: miza_ly@outlook.com.

Tel-01: +447477838391

Tel-02: +218917333191

Upgraded disc label station design, also can suit for conical and flask bottle.

Screw adjustment to suppress body movements accurately

Synchronization chain mechanism ensure labeling smooth and precise calibration.

Advanced technology of pneumatic coding system, print the batch number and expiry date clearly.

Transmission-type rolling bottles, make sure the labels attached more firmly;

Labeling transparent label without bubble and self-adhesive label without wrinkle;

Butterfly designed station, machine' s angle can be adjusted to adapt the bottle's shape.

3. Device Advantages

- Imported electric elements, stable performance, low failure rate;
- Adopting photoelectric detection, PLC control system, software operation, conveyor belt, labeling accurately and high precision;
- Can be operated alone or contract with the production line;
- No bottle not labeling, automatic alarm when achieve leakage label.
- The whole machine use the material of S304 stainless steel and anodized senior aluminum alloy.

4. The Schematic Diagram of the MWLM-A

- ❖ The bottle separated by **separate bottle device**, after the **order bottle device**, the bottle transported to the conveyor , move stably through the **press bottle device**;
- ❖ When the **sensor** test the bottles, send signal to **PLC**;
- ❖ The PLC received the signal and send to **servo motor** .
- ❖ The servo motor driving the **outing label motor** to send label.
- ❖ The bottle transported to the **brush label device**, which past the label on the bottle more smooth and then to the next process.

7. Technical Parameter

Model	MWL-2
Operating direction	Left or Right
Capacity(pcs/min)	30-120
Conveyor speed (m/min)	≤40
Labeling Accuracy	±1.0 mm
Label application	Adhesive sticker, opaque label
The inner diameter of label roll	76 mm
The outer diameter of label roll	350 mm(max)

The application of label	Height: 15-300 mm length 15-300 mm
The application of label objects	Can customizing
Printer use air	5kg/cm ²
Power (w)	800W
Voltage (In China)	AC220V 50/60HZ Single side (Can customized as buyer need)
Weight (kg)	280kg
Machine size(mm)	2400 (L) 1300 (W) 1500 (H) mm
