Main Production Section:

Section 1. Feed Raw Material Collection And Dosing Process

Have Grain feed and feed additive Cast hopper,Pre-cleaning equipment,Bucket elevator,Dosing silo,etc.

Section 2. Feed Hammer Mill And Mixing Process

Adopt High efficiency Hammer mill,Pneumatic mixer,it can produce different mesh feed,it also have separate packing silo,so can pack Mash feed separate here.

Section 3. Feed Pellet Mill,Cooler,Sifter,Automatic Packing Process

Adopt High efficiency Pellet mill,Pellet cooler,Roller crusher and Rotary Sifter,it can produce high quality feed pellet for poultry or livestock,it also can get crumb feed,feed pellet after process,can directly automatic packing in bag for storage.

Section 4. Auxiliary Equipment And Steam Boiler System

It will use to match feed production process,including Electric hoist system,Steam Boiler System ,Air compressor system,Oil adding system.

Steam boiler system with steam capacity 1t/h,it can be gas or oil type,use to supply steam for pellet mill steam conditioner device,make feed raw material soft,improve feed pellet mill production capacity and feed pellet quality.

Section 5. Electric Control System Section

Including electric cable for equipment,It will use to Control all production section,make it work smoothly and ensure continuity and safety of operation feed production process.

Section 6. Installation Material

Including steel frame,platform,dust collection pipe system,standar parts,etc. it will meet installation use.

4.Full Feed Plant Area Estimated:

A). Equipment line: 15*10=150m².

B). For Warehouse: Generally, raw materials need to be reserved for 2 weeks, the finished product reserves for 1 week, feed pellet line production yield is 10tons/hour, estimated working 8 hours/day, so 80 tons/day, working 5 days /week, so reserve finished product 400 tons/week and half month need 800 tons of raw materials. general consider are based on 1ton/m²,

So :Raw material area: 800m².

Finished production area: 400m²;

Considering office, lab, meeting room and so on: 200m²;

So total area estimated is : 150+800+400+200=1550m².

The area is estimated, may have little tolerance according to your field. Warehouse of material and finished production, office, you can calculate according to your local situation based on above way. Such as working time and market demand so on.

5. Service: We devote to all-round service of all the products from design, offer, production, shipment to maintenance.

Our professional after-sales service include: free design, guidance, onsite installation, and debugging, training,.

After selling, we provide the warranty of four years and free technical guidance and spares parts supply.
